

# Injury Assessment Report

Date: 2025-06-26 11:46:47

**Injury Type: Cut**

## Precautions:

- Apply firm pressure with a clean cloth to control and stop the bleeding.
- Rinse the cut thoroughly with clean water after bleeding is controlled.
- Clean around the cut using mild soap while avoiding direct contact with the wound.
- Do not use hydrogen peroxide or iodine inside the cut to avoid tissue damage.
- Use sterilized tweezers to remove any visible dirt or foreign objects.
- Cover the cut with a sterile bandage and change it daily or if it becomes dirty.

## Recommended Medications:

- Apply over-the-counter antibiotic ointment like Neosporin to prevent bacterial infection.
- Use petroleum jelly to keep the wound moist and reduce scab formation.
- Cover with sterile adhesive bandages or gauze to protect the cut.
- Take acetaminophen or ibuprofen for pain management as needed.
- Use prescription oral antibiotics like amoxicillin if the cut is deep or infected.
- Receive a tetanus shot if the cut is caused by a dirty object and immunization is not current.
